

10-core single-mode fiber optic cable from Huijue

? Which ones are actual in 2024?

4k Hdmi Optical Fibre Cable 50m Hbmi Fiber Optical Cable 100m 4k Hdmi Standard Cable 10m

? Which ones belong to the premium segment?

100mts Hdmi Fiber Optic Cable Hdmi Extander Fiber TX / RX HDMI Fiber Optic Cable - 100m

? Which ones are the cheapest?

16 Core Outdoor Cable Mm 4 Core 8core 12core 24core Fiber Cable Mm Commsope 4k Hdmi Standard Cable 10m

Article Overview

A 10-core single-mode fiber optic cable from Huijue is designed for long-distance, high-speed data transmission, suitable for telecommunications, internet, and network infrastructure applications.

Overview

Huijue manufactures single-mode fiber optic cables, which are optimized for transmitting data over long distances with minimal signal loss. Single-mode fibers have a very thin core, typically around 8-10 microns, allowing light to travel straight down the fiber without reflection, which ensures high-quality, long-distance communication. A 10-core configuration means the cable contains ten individual single-mode fibers bundled together, allowing multiple channels or redundant paths within a single cable.

Applications

- o Telecommunications: Long-distance telephone and internet connections.
- o FTTP/FTTH: Fiber-to-the-premises or fiber-to-the-home installations.
- o Data Centers: High-speed interconnects between servers and network equipment.
- o Monitoring and Control Systems: Multiple cores can support network and monitoring channels simultaneously.

Technical Considerations

- o Core Count: The 10 cores allow for multiple simultaneous connections or redundancy. When designing a network, the number of cores is calculated based on the number of systems, routes, and spare fibers, typically adding 10-20% extra for future expansion.
- o Cable Construction: Single-mode cables can be loose tube or tight-buffered, depending on whether the installation is indoor, outdoor, or exposed to harsh environments.
- o Distance and Performance: Single-mode fibers are ideal for distances exceeding 100 km, with very low attenuation, making them suitable for backbone networks.
- o Connector Compatibility: These fibers can be terminated with standard connectors like SC, LC, or FC,

10-core single-mode fiber optic cable from Huijue

depending on the network equipment .

Sourcing

Huijue single-mode fiber optic cables are available for bulk purchase through verified suppliers and importers, offering competitive pricing for large-scale projects . For specific technical specifications, datasheets, or customized cable solutions, contacting Huijue or authorized distributors is recommended. In summary, a 10-core single-mode fiber optic cable from Huijue provides a reliable, high-performance solution for long-distance data transmission, supporting multiple channels and future network expansion while maintaining low signal loss and high bandwidth.
