

48-core optical cable project construction budget

Preview

Median costs in 2025 were \$18 per foot for underground builds and \$8 per foot for aerial builds, with significant variation based on terrain, density, and construction methods, according to the Fiber Broadband Association. The 48 core fiber cable price depends on several technical and logistical factors that influence its. Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. For 48-core OPGW cables, recent market data (over the past year) shows consistent price clustering between USD \$5. The initial cost of installing fiber optic cables can vary.
