

Article Overview

YOA Cables and CBI-electric: African Cables are leading African manufacturers of optical fibre cables, including multi-core configurations suitable for telecommunications and industrial applications.

Key Manufacturers

YOA Cables YOA Cable is recognized as Africa's largest optical fibre cable manufacturer, offering advanced optical fibre products designed for high-speed and flexible applications. They have developed Fast Fusion Technology (FFT), which improves handling during installation, reduces accidental damage, and minimizes the need for specialist equipment. YOA Cables focuses on innovation, local talent development, and STEM skill enhancement, making them a reliable choice for 4-core optical fibre cable supply in Africa . **CBI-electric: African Cables** CBI-electric: African Cables, based in South Africa, manufactures a wide range of cables, including fibre optic cables for telecommunications. With a long history since 1935, their Vereeniging factory produces high-quality cables for mining, utilities, industry, and renewable energy projects. They provide turnkey solutions and emphasize technological development and quality delivery, making them suitable for both local and export markets . **Aberdare Cables** Aberdare Cables, part of the Hengtong Group, operates three manufacturing sites in South Africa and supplies a variety of cables, including optical fibre solutions. They offer engineering support, installation services, and diagnostic testing, which can be advantageous for large-scale infrastructure projects requiring 4-core optical cables .

Considerations for Procurement

- o **Product Specifications:** Ensure the manufacturer can provide 4-core optical cables with the required fibre type (single-mode or multi-mode) and performance standards.
- o **Installation Support:** Companies like YOA and Aberdare offer technical guidance and installation support, which can reduce deployment risks.
- o **Local Availability:** South African manufacturers provide regional distribution, which can reduce lead times and shipping costs.
- o **Innovation and Quality:** YOA's FFT and CBI-electric's ISO-certified production ensure high-quality, durable cables suitable for demanding environments. For sourcing 4-core optical cables in Africa, YOA Cables is the most specialized in optical fibre, while CBI-electric: African Cables and Aberdare Cables offer broader cable solutions including fibre optics, making them reliable options depending on project scale and technical requirements .

ADSS fiber cable and accessories for 35kV TL In Kenya 2023, GL FIBER supply 400km 24 core G652d fiber cable to
