

Battery connected to fiber optic cable

Preview

The Battery Backup Unit (BBU) provides power so that you will be able to make any calls from your home phone. This type is a BBU at the Optical Network Terminal (ONT). However, if your residential voice telephone service is provided using fiber optics, fixed wireless, or by coaxial cable, rather than the traditional twisted pair copper-based line, the residential voice telephone service requires backup battery power to continue functioning during a power outage. See below for pictures. In this article, you'll learn about the technical aspects of your Internet Battery Backup, including how it works, how it's installed in your home, and how to check that it's properly connected. Stop using the Internet Battery Backup and immediately disconnect it from the wall outlet if you notice. A battery includes a folded bicell battery stack with an embedded fiber optic cable and sensor. If you've got Fibre to the Home or Fibre Home Phone you'll get a modem, a battery back-up unit and a BT.
