

Cable tray prices supplied between China and Europe

Article Overview

Cable trays in China range from \$0.80 to \$76 per unit depending on type and material, while European industrial cable prices are around 1,090 EUR/100 kg for copper-based cables.

Cable Tray Pricing in China

Cable trays are available in various types such as ladder, perforated, wire mesh, and solid-bottom trays, made from steel, stainless steel, aluminum, or FRP. Factory-direct or OEM options are common, with prices ranging from \$0.80 to over \$76 per unit, depending on material, size, and customization. Bulk purchases often include volume discounts, and suppliers may offer tailored solutions for load capacity, environmental conditions, and installation requirements. B2B buyers prioritize durability, safety, and compliance, while B2C buyers may focus on aesthetics and ease of installation.

Cable Pricing in Europe

European cable prices are influenced by metal costs, tariffs, and logistics. For May 2026, LAPP copper cable prices (LCP) are around 1,090 EUR per 100 kg, reflecting recent LME copper cash settlements and surcharges for conversion and logistics. Prices vary based on cable type, shielding, standards, and construction, and are affected by factors such as the US Section 232 tariffs on copper semis, container freight costs from Asia, and insurance surcharges. Aluminum-based cables are generally lower in cost but may have different performance characteristics.

Logistics and Procurement Considerations

- o Shipping from China to Europe adds freight, customs, and insurance costs. Container shipping and port handling fees can significantly affect the total landed cost.
- o Material choice impacts both price and compliance: stainless steel and FRP trays are more expensive but offer corrosion resistance and fire safety.
- o Bulk orders reduce per-unit cost but require higher upfront investment.
- o Supplier selection: Verified manufacturers and distributors on platforms like Made-in-China or TradeWheel provide competitive pricing and quality assurance.

Market Trends

- o The cable tray market is growing globally, driven by construction and industrial expansion, with Asia-Pacific being the largest and fastest-growing region.
- o Innovative designs for higher cable capacity and easier installation are increasingly available, which may

Cable tray prices supplied between China and Europe

slightly increase unit costs but improve long-term efficiency .

o Copper price volatility and geopolitical factors can affect European cable costs, so buyers should monitor LME prices and supplier quotations closely . For a precise quote, it is recommended to contact multiple Chinese manufacturers for cable trays and European cable suppliers with specifications, quantities, and delivery terms to compare total landed costs.

Find the latest cable tray price list for 2025. Compare B2B and B2C pricing, materials, and supplier options. Click to

The Cable Tray market was valued at \$8.2 billion in 2025 and is projected to reach \$13.7 billion by 2034, growing at 6.5% CAGR.
