

Article Overview

Affordable cable tray supports in Norway can be sourced from suppliers like RS Online, Nordic Wire Tray, IndexFix, Meka, and MP Husky, offering a range of brackets, clamps, and profiles suitable for various installations.

Suppliers and Options

RS Online Norway offers a wide range of cable trays and management systems, including metal and wire mesh trays, suitable for commercial and industrial use. Their products are designed for easy installation and maintenance, making them a cost-effective choice for standard projects. Nordic Wire Tray (NWT) provides flexible and customizable wire trays with long spacing between support brackets, reducing the number of supports needed and lowering installation costs. Their X-Tray system is designed for quick assembly with minimal tools, which can save labor expenses. IndexFix specializes in profiles and supports for cable trays, including wall-mounted, suspended, and rail-mounted systems. They offer solutions for light, medium, and heavy loads with finishes like galvanized steel, stainless steel, PVC, and yellow plastic-coated options, allowing you to choose cost-effective materials for your specific environment. Meka manufactures high-quality cable support systems, including galvanized steel and aluminum trays. Their KS80 cable ladders and tube side profiles are suitable for high-load applications, but they also offer standard trays that are more budget-friendly for general installations. MP Husky provides cable tray clamps and supports engineered for industrial and commercial use. Their clamps are designed for easy installation, reducing labor costs, and are available in cost-effective materials like unfinished iron, making them a practical choice for budget-conscious projects.

Tips for Cost Savings

- o Choose longer bracket spacing: Systems like NWT X-Tray allow fewer supports, reducing material and labor costs.
- o Select appropriate material: Galvanized steel or PVC supports are cheaper than stainless steel for indoor or low-corrosion environments.
- o Use modular systems: Pre-fabricated profiles and clamps from IndexFix or MP Husky simplify installation and reduce on-site labor.
- o Buy standard sizes: Custom trays are more expensive; standard dimensions often meet most project requirements. By comparing these suppliers and selecting the right material and support spacing, you can find affordable and reliable cable tray supports in Norway suitable for your project needs.
