

DIY Rain Canopy for Cable Trays

Preview

A slide wire canopy is a flexible shade system that moves along tensioned cables, allowing you to adjust coverage as needed. Add extra shade and style to your outdoor living space with a wire-hung canopy system. These billowing shades easily slide on the cables they hang from so you can have shade when you want it and retract them when you want a little more sun. This DIY project costs \$200-800 depending on size and materials, takes one weekend to complete, and provides years of adjustable outdoor comfort. The system uses marine-grade. Give your porch or deck a sleek, modern makeover with this easy-to-follow guide on how to install DIY cable railing. He built a frame from EMT and T Connectors, and connected it to his house with removable hardware (he posted an update regarding these, so be sure to check it out). He attached it to the.
