

Article Overview

Ladder-type cable trays in Denmark typically range from EUR50 to EUR150 per 2.4-meter section, depending on material and specifications.

Price Overview

Ladder cable trays, especially hot-dip galvanized steel types, are commonly sold in standard lengths of 2.4 meters. Prices vary based on material, width, height, and load capacity. For example, a standard galvanized ladder tray may cost around EUR50-EUR80 per section, while stainless steel or aluminum versions can reach EUR100-EUR150 per section depending on supplier and project requirements .

Material Options

- o Galvanized Steel: Most common, durable, and cost-effective for indoor and outdoor use .
- o Stainless Steel: Corrosion-resistant, suitable for harsh environments or offshore projects .
- o Aluminum: Lightweight and corrosion-resistant, often used where weight reduction is important .
- o Fiberglass (FRP/GRP): Non-conductive and corrosion-resistant, ideal for chemical or marine environments .

Accessories and Fittings

Cable tray systems often require brackets, connectors, and fittings, which are priced per unit. These components are essential for stable installation and can add EUR5-EUR20 per piece depending on type and material .

Suppliers in Denmark

- o Lemu.dk: Offers a variety of cable trays and ladder systems in different widths and heights .
- o Eurostrut: Provides distribution trays and NATO-type cable trays; pricing available via quote .
- o Oglaend System: Supplies ladder and tray systems for heavy cable support, including offshore and onshore applications .

Buying Tips

- o Request quotes from multiple suppliers to compare prices and delivery options.
- o Consider material and load requirements to avoid overpaying for unnecessary specifications.
- o Include fittings and installation accessories in your budget for a complete system. By using these guidelines, you can estimate the cost of ladder-type cable trays in Denmark and plan your procurement effectively .
