

Article Overview

Fiber optic cable prices in Denmark vary widely depending on type, length, and supplier, typically ranging from a few hundred to several thousand DKK per cable.

Overview of Pricing

- o Farnell Denmark offers a wide selection of fiber optic cables from leading manufacturers such as Siemens, Multicomp Pro, Broadcom, L-com, and Phoenix Contact. Prices are listed excluding VAT and vary by cable type and specifications, with options for same-day dispatch and technical support available .
- o Mouser Denmark provides fiber optic cables priced per unit or per foot, allowing filtering by quantity. Prices depend on the cable type (single-mode or multimode), jacket material, and length. Chainflex CFLG TPE fiber optic cables, for example, are priced per foot, and bulk orders can reduce the unit cost .
- o Fiberkabel.dk specializes in pre-terminated fiber optic cables, patch cables, and network cables. Prices are in DKK excluding VAT and shipping. They offer multimode cables up to 400 meters and single-mode cables up to 1000 meters, with options for custom lengths and connector types. This supplier is suitable for professional infrastructure, data centers, and network upgrades .

Factors Affecting Price

- o Cable Type: Single-mode cables are generally more expensive than multimode due to longer transmission distances and lower signal loss.
- o Length: Longer cables increase the price proportionally.
- o Pre-termination: Pre-terminated or patch cables cost more than bulk cable spools due to labor and connector quality.
- o Material and Jacket Type: Outdoor-rated, armored, or flexible cables may have higher prices.
- o Supplier and Brand: Premium brands or specialized cables can significantly affect cost.

Practical Advice

- o For short runs or patching, pre-terminated cables from fiberkabel.dk are convenient and cost-effective.
- o For bulk installations, purchasing spools from Mouser or Farnell Denmark may reduce per-meter costs.
- o Always check whether prices include VAT and shipping, as these can add significantly to the total cost. By comparing suppliers and considering cable type, length, and pre-termination, you can select the most cost-effective fiber optic solution for your project in Denmark .
