

Different voltages in Saudi Arabian power distribution boxes

Preview

The country currently utilises a dual-voltage power distribution system. In residential and light commercial buildings the Kingdom uses 127 volts, whereas 220 volts is required in for larger commercial and industrial applications. With more than 70% of the world now using a 230/400 volt. While coming to Saudi Arabia, you must be thinking about how much is the electricity voltage in the country? Is it 110, 220, or 230? Can you drink tap water in Saudi Arabia? In the buildings constructed before 2012, you will find an electricity voltage of 110 / 220 V and the frequency is 60 Hz. In Saudi Arabia, type G plugs and sockets are the official standard. Like the rest of the Arabian Peninsula, Saudi Arabia has standardized on the British plug and outlet system.
