

Fiber Optic Cable Anti-vibration Whip Price Quotation

Article Overview

The price of fiber optic cable anti-vibration whips varies by cable diameter, quantity, and supplier, and is typically provided upon request after confirming technical specifications.

Product Overview

Anti-vibration whips, also known as spiral vibration dampers, are designed to protect ADSS and OPGW fiber optic cables from mechanical oscillations caused by wind, thermal expansion, or nearby machinery vibrations. They are made of high-strength, high-elasticity PVC plastic and are suitable for cables with diameters less than 12mm. These dampers work by attenuating vibration energy and reducing amplitude, thereby preventing micro-bending, signal loss, and premature cable failure .

Installation and Specifications

- o The model selection depends on the cable diameter and span length .
- o Multiple dampers may be installed along a single cable span, typically near poles or towers.
- o For spans of 750-900 meters, 8 dampers per span are commonly recommended .
- o They can be shipped via courier, airfreight, or ocean freight, depending on the supplier and location .

Pricing Information

- o Suppliers such as HNSLTX and Alibaba vendors do not list fixed prices online.
- o Prices are quoted individually after confirming the technical data, quantity, and shipping requirements .
- o To obtain a price, you should contact the supplier directly with your cable specifications, required quantity, and delivery location.

Additional Considerations

- o Ensure the dampers are compatible with your cable type (ADSS or OPGW) and installation environment.
- o Proper placement and installation are critical for maximizing vibration attenuation and protecting signal integrity .
- o High-quality dampers are UV-resistant and durable, suitable for long-term outdoor use. For a precise quote, it is recommended to send an inquiry to suppliers like HNSLTX, ZTocable, or Alibaba vendors, providing your cable diameter, span length, and quantity requirements. This ensures you receive an accurate price tailored to your project needs .
