

Fiber Optic Cable Grounding Clamp

Preview

The Bonding Clamp is used to ground OPGW to the tower by attaching to the tower grounding wire. Specific requirements vary from one utility to another. The product is an aluminum extruded parallel groove clamp. The clamp is available with one or two bolts, depending on the. Typically ships in 28 day (s) Actual lead time confirmed upon receipt of order. Worm-gear design ensures even force distribution. Tariff may apply if shipping to the United States. Tariff costs are calculated and will be displayed in. Fiber optic cable clamps are devices used to secure and stabilize fiber optic cables in a wide range of applications, including telecommunications, data centers, and network systems. Its primary function is to dissipate surge voltages caused by lightning strikes or electrical faults, protecting sensitive equipment and infrastructure. These clamps are critical in.

Secure your fiber optic cables with our armored grounding kit. Includes 6 AWG terminal and #10 mechanical clamp. Worm-gear design ensures even force

The FIBERLIGN Cushion Clamp uses a combination of structural reinforcing rods (SRR) and elastomer inserts at the ends of the clamp halves to protect the

Installing a grounding clamp not only safeguards your fiber optic cables but also extends the lifespan of your equipment. You should keep in mind that preventive measures are far more cost-effective than

Explore LCSC Electronics" wide selection of electronic components. Search inventory, pricing, and datasheets now to find the right component for your project.

Select a grounding clamp that suits your fiber optic cable's type and diameter. Utilize clamps specifically designed for fiber optics to ensure a secure connection without damaging the cable.

This Micro Armor Grounding Kit allows you to quick and easily ground your 2 through 24 strand Micro Armor(TM) Fiber Optic Cabling. Includes clamp and grounding strap.
