

# Fiber Optic Cable Line Resources Entered into Database

## Preview

Our dataset covers over 500,000 miles of fiber optic cables across North America, managed by approximately 400 companies. InfraNav is known for its extensive digital infrastructure databases, including but not limited to terrestrial fiber optic networks and data centers, which we develop and maintain in-house. Regular updates capture new rollouts of ICT infrastructure within our growing databases to keep up with the. GeoTel is a trusted resource of fiber maps and telecom datasets for infrastructure developers, government agencies, and various organizations looking to leverage accurate and up-to-date data for their operational, financial, and network planning needs, and much more. GeoTel is the single leading. As one of the leading fiber location databases, FiberLocator conveniently provides you with detailed maps and information on hundreds of carriers, thousands of data centers and hundreds of thousands of on-net buildings to quickly grow and scale your business. See FiberLocator in Action! Request. Analyze network nodes within a 10 km radius using our automated API service. A demonstration app to displaying the use of Machine Learning models aimed at identifying telecommunication towers from Satellite Imagery. Our map advisers can prepare a snapshot of a single address - or - you can use the self-service SaaS-based catalog of fiber maps and data through FiberLocator Online.

Building a fiber-optic network is a complex, multi-step process that goes far beyond simply choosing between aerial or
