

Fiber Optic Cable Tray Cold Aisle Fixing Manufacturers

Article Overview

Leading manufacturers of fiber optic cable trays for cold aisle containment include AZE Systems, LongXing, Basor Electric, and various Chinese suppliers offering modular data center solutions.

Key Manufacturers and Products

AZE Systems offers a wide range of fiber optic cable trays, wire mesh trays, and fiber routing channels suitable for data centers. Their products are designed to protect and route fiber optic patch cords, multi-fiber assemblies, and intrafacility cables, with options for ceiling suspension and modular installation, making them ideal for cold aisle environments . LongXing provides optical cable trays and ducting systems with tool-less installation, snap-on covers, and flame-retardant materials. These trays are designed for easy maintenance and quick deployment in data centers, supporting fiber optic cabling between network cabinets and terminal devices . Basor Electric specializes in Basorfil cable ladder runways and fiber optic management systems. Their solutions include halogen-free PC-ABS materials compliant with UL 94 V-0, ensuring safe and reliable routing of optical cables. Basor products focus on bend radius management and smooth cable runs, which are critical for cold aisle containment and high-density server environments . Chinese Manufacturers listed on platforms like Made-in-China provide modular cold aisle containment systems and cable trays for data centers. These suppliers offer contained cold aisle solutions, precision cooling integration, and flexible cable management options suitable for large-scale deployments . TopwellTech supplies network cabling containment products, fiber optic raceways, and wire mesh cable trays, along with raised access flooring and network cabinets. Their solutions are designed to meet diverse data center requirements, ensuring proper cable routing and containment .

Considerations for Cold Aisle Installation

- o Material and Fire Safety: Choose trays made from flame-retardant or halogen-free materials to comply with safety standards.
- o Bend Radius Management: Ensure the tray system maintains proper bend radius for fiber optic cables to prevent signal loss.
- o Modular and Tool-less Installation: Facilitates quick deployment and future expansion in cold aisle containment setups.
- o Ceiling or Rack Suspension: Supports direct routing from racks to distribution frames while keeping cables organized and accessible. These manufacturers provide solutions that combine physical protection, organized routing, and compliance with data center standards, making them suitable for cold aisle fiber optic cable management.
