

Article Overview

Key manufacturers and service providers in Ghana for communication equipment room construction include Spaicom, COMSYS, Telesuprecon, and APT Ghana, offering turnkey telecom infrastructure solutions.

Leading Companies

Spaicom Company Limited is a Ghanaian engineering firm specializing in telecom site construction and rehabilitation. Their services cover land acquisition, procurement of telecom materials, site surveys, construction, commissioning, and ongoing maintenance. With over 35 full-time and 200 part-time staff, Spaicom can manage numerous BTS sites monthly, providing comprehensive support for telecom infrastructure projects. COMSYS provides telecommunications solutions including VOIP, internet services, and connectivity. They focus on reliable network infrastructure and are ISO-certified, ensuring quality and secure installations for organizations. Telesuprecon specializes in telecommunications infrastructure, particularly fiber optic networks. They offer cell site construction, equipment installation, and proactive maintenance, having implemented over 23,000 km of optical fiber networks. Their services include turnkey project management from design to deployment. APT Ghana (Automation & Plant Technologies Limited) delivers electrical, automation, and telecom solutions. They provide system design, installation, and maintenance for telecom and construction projects, ensuring compliance with international standards and operational reliability.

Additional Providers

Other notable companies include Datacom Telecommunications Limited, Ultranet Telecom Ghana Limited, and Televerse, which offer IT services, fiber optic bandwidth, and mobile network design support. These companies provide specialized solutions for network optimization, RAN, CSN, and PCN systems.

Services Offered

- o Telecom site construction and commissioning
 - o Equipment room setup and maintenance
 - o Fiber optic network installation
 - o Turnkey project management
 - o VoIP and IP telephony solutions
 - o Network optimization and technical audits
- These companies collectively provide end-to-end solutions for communication equipment room construction, ensuring reliable, scalable, and secure telecom infrastructure for businesses and mobile network operators in Ghana.
