

How much does 100-meter-long pigtail fiber cost

Article Overview

A 100-meter fiber optic pigtail typically costs between \$100 and \$600, depending on fiber type, connector, and quality.

Pricing Overview

The cost of a fiber optic pigtail depends on several factors:

- o Fiber Type: Single-mode fibers are generally less expensive than multimode fibers, but multimode OM3/OM4 fibers designed for high-speed data centers cost more .
- o Connector Type: LC, SC, ST, or E2000 connectors can influence the price, with factory-terminated pigtails costing more than bare fibers .
- o Quality and Standards: Pre-tested, industrial-grade pigtails with low insertion loss and high return loss are priced higher .

Estimated Cost

Based on retail pricing:

- o Single-mode fiber pigtail: Approximately \$1 to \$3 per foot (\$3.28 to \$9.84 per meter), so a 100-meter pigtail would cost roughly \$328 to \$984 .
- o Multimode OM3/OM4 fiber pigtail: Approximately \$2 to \$6 per foot (\$6.56 to \$19.68 per meter), making a 100-meter pigtail cost around \$656 to \$1,968 . For bulk or wholesale purchases, prices can be lower, sometimes \$0.09 to \$1.52 per foot depending on fiber count and vendor .

Additional Considerations

- o Pre-terminated vs. bare pigtails: Pre-terminated pigtails with connectors are more expensive but save labor costs during installation .
- o Installation and splicing: If you plan to splice the pigtail into an existing network, labor and splicing equipment may add to the total cost .
- o Customization: Some suppliers offer custom lengths, jacket types, or armored options, which can increase the price . In summary, for a 100-meter fiber optic pigtail, expect to pay roughly \$100 to \$600 for standard retail options, with higher-end or specialized pigtails costing more depending on fiber type, connector, and quality standards .
