

How much does 12-core single-mode fiber cost

Article Overview

A 12-core single-mode fiber optic cable typically costs between \$0.50 and \$7.00 per foot, depending on construction, jacket type, and installation requirements.

Price Range

The cost of a 12-core single-mode fiber optic cable varies based on several factors:

- o Bulk cable materials: For wholesale or bulk purchases, prices generally range from \$0.50 to \$1.00 per foot for a 12-strand single-mode cable .
- o Retail or pre-terminated cables: Pre-terminated assemblies, armored cables, or plenum-rated cables can cost \$2.00 to \$7.00 per foot .
- o Construction and environment: Indoor riser-rated (CMR) or plenum-rated (CMP) jackets are less expensive than armored or gel-filled outdoor cables, which provide mechanical protection and moisture resistance .

Factors Affecting Cost

- o Fiber Type: Single-mode fiber (SMF) is generally less expensive per foot than multimode fiber but requires more specialized equipment for termination .
- o Strand Count: Higher strand counts increase cost proportionally; a 12-core cable is mid-range compared to 24- or 288-strand cables .
- o Jacket Material: PVC, LSZH, or plenum-rated jackets affect pricing due to fire safety and flexibility requirements .
- o Installation Environment: Outdoor, direct-burial, or armored cables cost more than indoor runs due to additional protection and materials .

Example Products

- o A 1000-foot spool of 12-strand OS2 single-mode plenum-rated cable for indoor/outdoor use is available on Amazon, typically priced in the \$500-\$700 range, equating to roughly \$0.50-\$0.70 per foot .
- o High-performance armored or gel-filled outdoor 12-core cables for long-distance transmission can reach \$5-\$7 per foot depending on specifications .

Summary

For a 12-core single-mode fiber optic cable, expect:

- o Basic indoor bulk cable: \$0.50-\$1.00 per foot

How much does 12-core single-mode fiber cost

o Pre-terminated or specialized outdoor cable: \$2.00-\$7.00 per foot The final cost depends on cable construction, environmental protection, and whether the cable is pre-terminated or armored, making it essential to match the cable type to your installation requirements .

Single mode fiber is a type of fiber optic cable with a very narrow glass core, about 9 microns in diameter, that carries

A 12-core single-mode fiber provides the necessary bandwidth to support 10G, 40G, 100G, and even 400G Ethernet standards

Fiber Optic Cable, Tight Buffer, Single-Mode, 12 Strand, TeraFlex®; Reduced water peak, 900 Micron, OFNR, Riser, Indoor/Outdoor,
