

How much does a building electrical distribution box cost in the Maldives

Article Overview

A new electrical distribution box in the Maldives typically costs between MVR 1,500 and MVR 10,000, depending on size, capacity, and material.

Price Range and Factors

The cost of a distribution box varies based on several factors:

- o Capacity and Size: Smaller boxes, such as 24-way distribution boxes, are generally on the lower end of the price range, while larger boxes, like 100-pair or industrial-grade enclosures, are more expensive .
- o Material: Boxes made from stainless steel or weather-resistant materials suitable for outdoor use tend to cost more than standard plastic or indoor boxes .
- o Supplier and Brand: Local hardware stores like Sonee Hardware, BlueSea Hardware, and SlymFitting offer competitive prices, while imported products through platforms like Desertcart include shipping, customs, and delivery fees .
- o Additional Costs: Installation, wiring, and circuit breakers are usually sold separately, which can increase the total expenditure.

Local Suppliers

- o SlymFitting: Offers a variety of distribution boxes suitable for residential and commercial use .
- o E-Talk Maldives: Provides larger capacity boxes, such as 100-pair distribution boxes .
- o Sonee Hardware and BlueSea Hardware: Stock a range of electrical enclosures and accessories, often with local delivery .
- o Desertcart Maldives: Offers imported stainless steel power distribution cabinets with all shipping and import duties included .

Recommendation

For a typical household or small commercial installation, a 24-way to 48-way distribution box is usually sufficient, costing around MVR 1,500-3,500. For larger commercial or industrial setups, prices can reach MVR 8,000-10,000 or more, especially for stainless steel or weatherproof enclosures. Always check with local suppliers for the latest availability and pricing, as shipping and import costs can affect the final price.
