

How much does a genuine fiber optic splice box cost

Article Overview

A typical fiber optic splice box costs between \$20 and \$200, depending on capacity, type, and brand.

Price Range Overview

- o Small wall-mount splice boxes for 6-12 fibers generally cost \$20-\$50 on platforms like Amazon and eBay .
- o Medium-capacity boxes supporting 24-48 fibers typically range from \$50-\$100, suitable for network rooms or MPOE installations .
- o High-capacity splice closures for 72-144 fibers, often used in FTTH or outdoor applications, can cost \$100-\$200 or more, depending on features like gel sealing, multiple cable attachments, and fusion splice capacity .

Factors Affecting Cost

- o Capacity: Higher fiber core capacity increases the price. A 12-core box is cheaper than a 144-core box .
- o Type: Wall-mount enclosures are generally less expensive than outdoor or pole-mount closures with weatherproofing .
- o Brand and Quality: Established brands like Graybar or FiberNext may charge more for durability and warranty .
- o Features: Additional features such as LC couplers, gel sealing, or modular trays for fusion splicing can increase cost .

Buying Tips

- o Compare prices across Amazon, eBay, and specialized distributors to find the best deal .
- o For bulk purchases or high-capacity boxes, consider Alibaba or industrial suppliers, which may offer lower per-unit costs .
- o Check for compatibility with your fiber type (single-mode or multimode) and installation environment (indoor vs. outdoor). In summary, a popular fiber optic splice box typically costs \$20-\$200, with the exact price depending on capacity, type, and additional features. For precise pricing, check the product listings or request a quote from distributors.
