

How to hide the fiber optic cable for internet access via router

Preview

A mesh network wifi router (with satellites) is the best way to cover your home while overcoming signal degradation because of the walls and floors. Assuming your ISP is cable, wire a receptacle in a closet and pull the cable into the same closet. However, one common problem remains: how can installers run fiber cable indoors without damaging decoration or leaving. Concealing your network cables is the best way to keep them safe, and there are some clever methods to tuck them away. Read on for creative ideas to conceal and keep your network cables safe. If you have seen my Pinterest, you'll know how much I love hiding unsightly electronic products - I have a dedicated board called " Smart Home Ideas ".
