

How to wrap a distribution box around a pillar

Preview

For posts situated against a wall or a beam, the three-sided box method allows the wrap to be assembled and slid into place around the post, with the fourth side secured last to complete the enclosure. A wood pillar wrap functions as a cosmetic covering designed to enhance the appearance or conceal an existing structural or decorative post. This project involves encasing an exposed column, often transforming a plain support into an architectural feature that complements the surrounding home. Our unique wrap-around feeder pillars are aesthetically pleasing and designed to provide additional capacity for small electrical components, to avoid the need for supplementary standalone feeder pillars. Whether you require a different size or shape of feeder pillar, or additional options such as hasp and staple, special labels, or different paint finishes, please contact us! Our in-house design. [How to UPGRADE Boring Wood Posts \(Genstone Pillar / Column Wrap Installation - Easy & DIY Friendly!\)](#) - YouTube [How to UPGRADE Boring Wood Posts \(Genstone Pillar / Column Wrap Installation - Easy & DIY Friendly!\)](#) grab my FREE "How to Build a Gable Porch" Ebook ?. A distribution box is the heart of any electrical system. It takes the incoming power and safely distributes it to different circuits throughout your building.
