

Article Overview

Huawei vertical optical splitters typically range from \$10 to \$50 per unit depending on split ratio and type.

Huawei optical splitters are available in various configurations such as 1x8, 1x16, and 1x32, with SC/UPC or SC/APC connectors, and are mainly PLC (Planar Lightwave Circuit) splitters for equal-ratio signal distribution . Prices vary based on the split ratio, connector type, and supplier. For example, 1x8 splitters are generally at the lower end of the price range, while 1x32 splitters are more expensive due to higher complexity .

Factors Affecting Price

- o Split Ratio: Higher split ratios (e.g., 1x32) cost more than lower ratios (1x8 or 1x16).
- o Connector Type: SC/APC connectors may be slightly more expensive than SC/UPC.
- o Supplier and Shipping: Prices differ between online distributors like Alibaba, router-switch.com, and direct Huawei suppliers .
- o Quantity: Bulk orders often reduce the per-unit cost.

Purchasing Options

- o Online Retailers: Websites like router-switch.com list Huawei optical splitters with fast shipping and competitive pricing .
- o Wholesale Platforms: Alibaba offers a wide range of Huawei splitters with options to request quotes for bulk purchases .
- o Direct Supplier Inquiry: Some suppliers, such as those on Made-in-China, require direct inquiries to provide pricing .

Recommendation

For accurate pricing, it is best to contact suppliers directly with the desired split ratio, connector type, and quantity. This ensures you receive the most up-to-date price and shipping options. Typical retail prices for standard Huawei vertical optical splitters range from \$10 for 1x8 splitters to \$50 or more for 1x32 splitters .
