

IK10 Fiber Optic Cable Fixing Clip for Islands

Article Overview

IK10-rated fiber optic cable clips provide robust, weather-resistant solutions for securing outdoor fiber optic cables, suitable for harsh environments including islands.

Overview

IK10 fiber optic cable clips are designed to secure and organize fiber optic cables while withstanding mechanical impacts and environmental stress. These clips are ideal for outdoor installations, including remote or island locations, where durability and corrosion resistance are critical .

Key Features

- o Impact Resistance: IK10 rating ensures the clips can withstand strong mechanical impacts, protecting cables from accidental damage .
- o Material Quality: Clips typically combine 304 stainless steel for metallic parts and improved polypropylene (PP) for plastic components, offering corrosion resistance and long-term durability in coastal or humid environments .
- o Cable Compatibility: Designed to hold fiber optic cables ranging from 2 mm to 7 mm in diameter, with some models accommodating power cables up to 14 mm .
- o Stackable Options: Single, double, and triple stack configurations allow flexible installation depending on cable density and layout requirements .
- o Mounting Flexibility: Clips can be mounted on walls, poles, or other surfaces using screws or adhesive pads, making them adaptable to various island infrastructure .
- o Cable Protection: Integrated bend radius control and secure clamping prevent fiber stress, tangling, or damage during installation and operation .

Applications

- o Telecommunication Networks: Ideal for FTTH, FTTx, and backbone fiber networks in outdoor environments .
- o Industrial and Data Centers: Can be used in telecom cabinets, security systems, and manufacturing facilities where fiber management is critical .
- o Island or Coastal Installations: Resistant to corrosion and environmental stress, suitable for humid, salty, or windy conditions .

Recommendations

IK10 Fiber Optic Cable Fixing Clip for Islands

For island deployments, choose clips with stainless steel and UV-resistant polypropylene, ensure proper mounting to withstand wind and salt exposure, and consider stackable designs for high-density cable runs. Adhesive or screw mounting can be selected based on surface type and installation permanence. These IK10-rated fiber optic clips provide a reliable, long-lasting solution for securing fiber optic cables in challenging outdoor environments, ensuring network stability and cable protection.

Each unit of the plastic hanger holds one run of 7mm rru cable and one run of power cable. We provide

The micrODC is a compact and versatile splice closure designed for FTTH networks. It provides IP68 environmental protection, IK10
