

Indoor 288-core optical cable

Preview

SlimCORE(TM) 288F is a subunitised OFNP (Plenum) rated indoor fiber cable engineered for ultra-high density in environmental air spaces and streamlined termination. Each ribbon shall have its own sub-unit tube for easy handling and management. The loose tube gel-free design is fully waterblocked using craft-friendly, water-swellaable materials, which means cable access is simple and no clean. Universal OFC MLT: GLASS YARNS + CST + LSZH with 12 Tubes of O2. Universal (Indoor/Outdoor) dry core optical fiber Multi Loose Tube cable with glass yarns as strength member, Corrugated Steel Tape (Full Rodent Protected) armor and Low Smoke Zero Halogen outer jacket. A1, Feet jacket marking, Black jacket color Finish making your selections or clear them to view relevant specifications. The cable counts is up to 288 cores.

Fiber Indoor/Outdoor cable, TeraSPEED™, Single Jacket All-Dielectric, 288 fiber, Riser Rated, Gel-Free, Stranded Loose Tube, Singlemode G.652.D and G.657.A1, Feet jacket marking, Black jacket color

The loose tube gel-free design is fully waterblocked using craft-friendly, water

Discover 288 core optical fiber cables with high-density core count for FTTH and telecom networks. Ideal for long-distance, high-speed data transmission.

288 singlemode fibres for high density data center distribution applications. The fibres shall be ribbonized for easy mass fusion splicing and termination with 12-fibre MPO style connectors.

Weichuang Optics offers high-quality and low price 12 Core Indoor Fiber Optic Cable for indoor applications ensuring smooth data communication.

An Optical Distribution Frame (ODF) is a specialized enclosure designed to manage, connect, protect, and distribute fiber optic cables in telecom and data networks. Think of it as a

288F Easy Branches Indoor Riser Fiber Cable - High-density, flame-retardant (OFNR) fiber optic cable for easy installation in data centers, telecom, and enterprise networks. Features 288 fibers with low

Plenum Interconnect Indoor Fiber Optic Cable Single-Unit is RoHS 2 and REACH compliant and all multimode and singlemode cables (except OM1) utilize bend-insensitive optical fibers.

Ultra-high-density 288-fibre indoor OFNP rated optical cable with a 24-subunit design for large-scale installations in data centres and plenum spaces.

Indoor 288-core optical cable

Universal (Indoor/Outdoor) dry core optical fiber Multi Loose Tube cable with glass yarns as strength member, Corrugated Steel Tape (Full Rodent Protected) armor and Low Smoke Zero Halogen outer

LONDON, Sept. 24, 2025 /PRNewswire/ -- STL (NSE: STLTECH), a leading optical and digital solutions company, today showcased its advanced Unitube Single Jacket Indoor Fibre Optic Cable with 4-core ...

AFL now offers high fiber count Indoor/Outdoor MicroCore Cables. Waterblocked sub-units are helically stranded to provide sub-unitized cables ranging from 24 to 288 fiber counts. These cables are OFNR

GJPFXJH Fiber Cable is a indoor and outdoor fiber optic cable with small diameter, light weight, convenient installation and maintenance. Fiber Cable has excellent mechanical and environmental

The loose tube gel-free design is fully waterblocked using craft-friendly, water-swellaable materials, which means cable access is simple and no clean up is required.

The cable maximizes the use of critical duct space and can easily fit in 1.25-in inner duct. A specially formulated flame-retardant jacket allows this cable to be used in indoor general purpose

Our comprehensive guide to types of fiber optic cables. Learn all about the differences between single mode and multimode cables, as well as the various
