

Intelligent Integrated Network Cabinet

Preview

Embedded AI-powered intelligent design ensures comprehensive safety monitoring and environmental control for seamless equipment operation. These new strategies must include solutions that:
• Improve energy efficiency, space utilization and IT productivity
• Offer measurable savings in CAPEX and OPEX
• Offer location flexibility and compatibility with existing infrastructure
• Improve the ability to manage and control the IT. For different environments, models are available with various protection ratings such as IP20 or IP55, making them suitable for standard IT environments as well as more demanding industrial applications. Whether you need compact wall-mounted racks for smaller networks or large floor-standing. Near-end cooling and high-efficiency power supply. The average annual PUE of the netcol5E is less than 1.5. Free from traditional cabinets, it can even be directly placed in the office area to save space! The "full rack" concept is fully modular.
