

Is a distribution box considered equipment or a tool

Preview

Tool is a device held and used by hand for a specific task. The purchase of equipment either as direct purchase or lease-purchase, deteriorate in use, or are easily broken, damaged or lost. Examples include paper, pencils, must be replaced frequently are also charged as supplies or equipment. One common accounting challenge districts face is that of distinguishing between supplies and equipment, between equipment and improvement of grounds, and between equipment/building fixtures and service systems. Nevertheless, districts must correctly identify each expenditure if they are to achieve. When assets are acquired, they should be recorded as fixed assets if they meet the following two criteria: Exceeds the corporate capitalization limit. The capitalization limit is the amount of expenditure below which an item is recorded as an expense, rather than an asset. They are generally categorized under one of two expense types: Supplies: If the tools are low-cost and have a short useful life, they can be treated like other. Supplies vs. equipment differ primarily in usage length and tax treatment: supplies are short-term assets consumed within a year, while equipment is a long-term depreciable asset.
