Mauritius completed 100% fiber-to-the-home coverage in 2017, with 100% of households passed by fiber and fixed broadband speeds around 55 Mbps on average. The island is connected by five major undersea cables--SAFE, LION/LION2, METISS, MARS, and T3--with capacities including ~800 Gbps on SAFE, ~1.28. CEB FiberNET is a wholly owned subsidiary of the Central Electricity Board incorporated in October 2016. Our network provides Mauritius with a second national fiber optics backbone which connects to the CEB substations located across the island and to the submarine cable stations for international. Fiber optic networks: Fiber optic cables are used to transmit data at high speeds over long distances. These networks provide high bandwidth and are commonly used for internet connections, telecommunication services, and television broadcasting. Founded in 2011, we specialize in turnkey infrastructure networks including fiber optics, 5G installations, network optimisation, data and data center infrastructure, networking, PABX. We are specialised in the manufacturing of both fibre optic last mile FTTH solutions and copper cable assemblies. Photonics also offers technical advice with regards to fibre optic procurement. Networking cable is a piece of networking hardware used to connect one network device to other network devices or to connect two or more computers to share devices such as printers or scanners.
