

Article Overview

Key French manufacturers of micro-modules include Cortus SAS, Presto Engineering, EASii IC, Dolphin Integration, SCINTIL Photonics, Kalray, and SiPearl.

Notable Companies

Cortus SAS - Based in Mauguio, Occitanie, Cortus specializes in embedded systems and microcontrollers, including RISC-V based microcontrollers for IoT and automotive applications, making them a key player in micro-module solutions . Presto Engineering - Located in Meyreuil, Presto Engineering focuses on ASIC design and development, providing full lifecycle services from design to testing, suitable for micro-module integration in medical, automotive, and industrial sectors . EASii IC - A Grenoble-based fabless ASIC design house, EASii IC develops integrated circuits and microelectronics solutions, including low-power and high-temperature components, supporting micro-module applications in aerospace, telecommunications, and medical industries . Dolphin Integration - Operating from Meylan, Dolphin Integration specializes in energy-efficient System-on-Chip (SoC) solutions and IP products, offering advanced design platforms for micro-modules in electronics devices . SCINTIL Photonics - A fabless company developing silicon photonic integrated circuits with integrated lasers, SCINTIL provides micro-module solutions for high-speed optical interconnects, data centers, and 5G infrastructure . Kalray - A fabless semiconductor company pioneering processors for intelligent systems, Kalray designs micro-modules for AI, automotive, and industrial applications . SiPearl - Specializing in high-performance, low-power microprocessors for supercomputing and AI, SiPearl produces micro-modules for strategic sectors including defense, medical research, and energy .

Additional Resources

Other French companies involved in microelectronics and micro-module production include Soitec, STMicroelectronics France, Sequans Communications, and LETI, which provide semiconductor materials, IoT modules, and research-driven microelectronics solutions . These manufacturers collectively cover a wide range of micro-module applications, from IoT and automotive to high-performance computing and photonics, making France a significant hub for microelectronics innovation.
