

## Article Overview

Lithuania hosts several manufacturers and engineering companies specializing in intelligent power distribution cabinets, including UAB "Ramus Baltic", UAB "Glori" ir Ko, and ASISTEMOS.

## Key Manufacturers

UAB "Ramus Baltic" is a leading engineering service company providing high-quality electrical equipment and intelligent cabinet solutions. They design, assemble, and commission relay protection cabinets, automation cabinets, control cabinets, and telecommunications cabinets. Their services cover low-, medium-, and high-voltage systems, including SCADA integration, RTUs, and compliance with European standards. They also represent international brands like Terasaki, NIEAF-Smitt, MORS-Smitt, and Woodward in Lithuania, ensuring access to specialized non-standard electrical and automation equipment (UAB "Ramus Baltic"), . UAB "Glori" ir Ko specializes in sheet metal fabrication and powder-coated metal surfaces, producing enclosures and distribution boxes suitable for electrical and automation applications. They provide custom solutions for modular switchgear and distribution cabinets, supporting both wholesale and retail markets (Europages), . ASISTEMOS offers electrotechnical and automation equipment manufacturing with over 20 years of experience. They focus on innovative solutions and high working standards, including intelligent distribution cabinets for industrial and commercial applications (Europages), .

## Energy Storage and Intelligent Cabinet Solutions

EIEI POWER provides energy storage systems, battery cabinets, and solar inverter integration, offering intelligent power distribution solutions for renewable energy projects. Their products comply with EU directives and IEC 61439 standards, ensuring CE marking and conformity for European markets. They also provide technical support, system optimization, and 24/7 monitoring for industrial and commercial applications (EIEI POWER), .

## Additional Considerations

When selecting a manufacturer, consider:

- o Compliance with EU standards (Low Voltage Directive 2014/35/EU, EMC Directive 2014/30/EU, IEC 61439)
  - o Customization capabilities for automation, relay protection, and SCADA integration
  - o Support for renewable energy integration and energy storage solutions
  - o After-sales service including testing, commissioning, and maintenance
- These Lithuanian companies provide a range of intelligent power distribution cabinets suitable for industrial, commercial, and renewable energy
