

Article Overview

Smart distribution boxes in the Maldives typically range from MVR 3,000 to MVR 10,000, depending on capacity, brand, and features.

Price Overview

The cost of a smart distribution box in the Maldives depends on several factors:

- o Number of circuits: Smaller units (e.g., 12-18 circuits) are generally less expensive, while larger units (24-100 circuits) cost more .
- o Brand and quality: Premium brands like ABB or HAGGER, often required for compliance with local standards, increase the price .
- o Material and features: Smart boxes with fiber-reinforced plastic (GRP) or metal enclosures, integrated MCBs, and advanced monitoring features are priced higher .
- o Supplier and bulk purchase: Buying from local hardware stores like Sonee Hardware or SlymFitting may offer retail prices, while tenders or bulk orders through STELCO or Fenaka Corporation can reduce per-unit costs .

Estimated Price Range

- o Small smart distribution box (12-18 circuits): MVR 3,000-5,000
- o Medium smart distribution box (24-36 circuits): MVR 5,000-7,500
- o Large smart distribution box (50-100 circuits): MVR 7,500-10,000 or more, depending on customization and integrated smart features

Additional Considerations

- o Installation costs: Professional installation may add MVR 500-1,500 depending on complexity.
- o Maintenance and upgrades: Smart boxes with remote monitoring or IoT integration may require subscription services or software updates.
- o Local availability: Prices may fluctuate based on import costs, shipping, and stock availability in Male or Hulhumale. For the most accurate pricing, it is recommended to contact local suppliers directly, such as Sonee Hardware, SlymFitting, or verified wholesale suppliers listed on go4WorldBusiness, and request a quotation based on your specific requirements .
