The 1x4 Singlemode Bare Fiber PLC Splitter is a single-mode fiber optic splitter designed to divide an input optical signal into four separate outputs. This PLC Splitter is a 1x4, with 1 input and 4 output fibers with an even split ratio across all fibers regardless of input wavelength. Several center wavelength options are available (see Table 1. Narrowband couplers have a ± 15 nm bandwidth, dual-window couplers have a ± 40 nm bandwidth around. Thorlabs' Polarization-Maintaining 1x4 Fiber Optic Planar Lightwave Circuit (PLC) Splitters allow a user to split a single input signal evenly into 4 output signals, which is ideal for high-channel-count applications.
