

Order a Level 1 Distribution Box

Article Overview

You can order a Level 1 Distribution Box from specialized electrical suppliers such as Wieland, Murrelektronik, Himel, or industrial distributors, ensuring compliance with IEC standards and IP protection ratings.

Key Considerations

1. Type and Application Level 1 distribution boxes are typically used for low-voltage power distribution and signal management in residential, commercial, or industrial settings. They can support decentralized installation close to the load, enabling efficient energy distribution and smart building integration . Passive distribution boxes are ideal for connecting sensors and actuators to control cabinets, offering modularity and space-saving designs . 2. Material and Protection Distribution boxes are commonly made from high-strength ABS or polycarbonate, providing impact resistance and durability for indoor or outdoor use . Look for IP65 or IP67 ratings to ensure protection against dust and moisture . Some models also offer EMC shielding for sensitive electronics . 3. Features

- o Modular and pluggable components for easy installation and maintenance
 - o Integrated LEDs for troubleshooting
 - o Quick-release or hinged latches for convenient access
 - o Compatibility with smart building systems and decentralized energy distribution
4. Suppliers and Ordering
- o Wieland: Offers smart, pluggable distribution boxes for flexible building applications, with options for power, signal, and I&C distribution .
 - o Murrelektronik: Provides passive distribution boxes with modular components, IP65/IP67 protection, and space-saving designs .
 - o Himel: Supplies affordable, reliable distribution boxes compliant with international safety standards, suitable for final distribution and power management .
 - o DirectIndustry: Lists a wide range of enclosures and distribution boxes with various sizes, materials, and features for industrial applications .
5. How to Order Visit the supplier's website, select the appropriate Level 1 distribution box based on your voltage, IP rating, and modularity requirements, and contact their sales team for a quote or online purchase. Many suppliers provide technical support to help choose the right configuration for your project. By considering these factors, you can ensure that the Level 1 distribution box you order is safe, reliable, and suitable for your specific installation needs.
