

Price of 8-core optical fiber cable with power supply

Article Overview

The price of an 8-core optical fiber cable with power supply typically ranges from \$50 to \$200 per meter or assembly, depending on type, length, and supplier.

Cable Types and Features

8-core fiber optic cables come in single-mode or multimode configurations. Single-mode cables are ideal for long-distance communication, while multimode cables are suitable for short to medium distances, such as within buildings or campus networks . Outdoor cables, like the 8 Core GYTC8S Figure-8, feature steel-wire strength members, water-blocking systems, and armored PE sheaths for aerial or buried installation . Hybrid cables may combine fiber cores with copper or power lines to support simultaneous data and power transmission .

Pricing Overview

- o Standard 8-core fiber cables (without power supply) are available from suppliers like Alibaba, Mouser, and Made-in-China, with prices starting around \$50-\$100 per meter for bulk orders .
- o Cables with integrated power supply or hybrid functionality generally cost more due to additional materials and manufacturing complexity, often ranging from \$100-\$200 per meter or per assembly depending on length, fiber type, and environmental protection features .
- o OEM or bulk orders can reduce costs, especially for large-scale projects, by negotiating directly with manufacturers .

Supplier Options

- o Alibaba: Offers a wide range of 8-core fiber cables, including hybrid and armored types, with options for customization .
- o Mouser Electronics: Provides 8-fiber cable assemblies with datasheets and pricing for standard lengths .
- o Made-in-China: Factory OEM distributors allow bulk orders and custom specifications, which can lower per-unit costs .
- o ME Fiber Optic: Specializes in outdoor self-supporting armored cables suitable for aerial installation .
- o DigiKey: Offers fiber optic cables for indoor and data center applications, with detailed specifications for single-mode and multimode types .

Recommendations

- o Determine your application: Indoor, outdoor, aerial, or buried installation affects cable type and price.
- o Specify fiber type: Single-mode for long distances, multimode for short-range or campus networks.
