

Price of Electrical Box Distribution Box Cover

Article Overview

Installing a standard electrical distribution box cover typically costs between \$50 and \$180 for materials, with total installation costs ranging from \$350 to \$1,800 depending on labor and complexity.

Cost Breakdown

Materials: The cover itself varies by type and material. Basic plastic or metal covers for a single box usually cost \$50-\$80, while premium covers with features like AFCI/GFCI protection or larger multi-wire configurations can cost \$120-\$180 . Weatherproof or tamper-resistant covers may add 30-60% to the base price . **Labor:** Installation time depends on accessibility, wiring complexity, and whether additional work like conduit relocation or panel upgrades is required. For a straightforward replacement, labor typically takes 2-3 hours, costing \$300-\$600 total. More complex installations with additional circuits or behind-wall access can take 4-5 hours, raising total costs to \$900-\$1,800 . **Additional Factors:**

- o Box type and amperage: Larger or higher-capacity boxes increase both material and labor costs .
- o Location and access: Tight spaces, crawl spaces, or finished walls can increase labor time .
- o Safety features: Adding AFCI, GFCI, or RCD protection increases material costs and may require extra wiring .
- o Permits and inspections: Some regions require permits, which can add to the total cost .

Summary

For a typical residential installation of a standard distribution box cover:

- o Basic replacement: \$350-\$600 total
- o Premium or complex installation: \$900-\$1,800 total Planning ahead and specifying the exact box type, safety features, and installation requirements can help control costs and avoid unexpected expenses .
