

Price of Grinding Distribution Box Cover Plates

Article Overview

Grinding distribution box cover plates typically range from approximately \$20 to \$150 depending on size, material, and brand.

Overview

Grinding distribution box cover plates are essential components for protecting electrical distribution boards and ensuring safety. They are available in metal or plastic, with options for single or multi-way coverage, and may include pre-punched holes or knockouts for cable entry . These plates are often sold as spare or replacement parts for standard distribution boards.

Price Range

Based on available supplier data:

- o Metal or plastic gland/cover plates for industrial enclosures can cost \$20-\$50 for smaller or standard units .
- o Larger or multi-gang cover plates for commercial distribution boards may range from \$100-\$150, depending on brand and IP rating .
- o Prices may vary by region, supplier, and whether VAT or shipping is included. For example, distribution board accessories in South Africa list net prices from R 77.69 to R 399.13 EXCL. VAT, which roughly converts to \$5-\$25 USD for smaller plates and \$25-\$75 USD for larger units .

Factors Affecting Price

- o Material: Metal plates are generally more expensive than plastic due to durability and fire resistance.
- o Size and Configuration: Multi-gang or larger plates cost more than single-gang plates.
- o Brand and Certification: Trusted brands like Hager, Schneider Electric, and ERiS Industrial may charge a premium for compliance and reliability .
- o IP Rating: Plates with higher ingress protection (IP65-IP66) for industrial or outdoor use are priced higher .

Purchasing Tips

- o Check local electrical suppliers or online distributors for exact pricing.
 - o Confirm compatibility with your distribution board model.
 - o Consider bulk purchases for cost savings if multiple plates are needed.
 - o Ask about replacement or spare parts options, as some plates are sold separately from the main enclosure .
- By considering these factors, you can select a grinding distribution box cover plate that balances cost, durability, and compliance for your installation.
