

Article Overview

The price of trapezoidal cable trays in Lebanon varies widely depending on material, size, and finish, typically ranging from \$20 to \$100 per meter, with exact quotes available from local suppliers.

Overview

Trapezoidal cable trays are commonly used for supporting electrical cables in industrial and commercial installations. In Lebanon, suppliers such as Metas Lebanon and SFSP Lebanon offer a variety of cable trays, including ladder, wiremesh, and trapezoidal types, made from pre-galvanized steel, hot-dip galvanized steel, stainless steel, and aluminum. Prices depend on the material, tray width, height, and load capacity.

Factors Affecting Price

- o **Material:** Stainless steel and aluminum trays are more expensive than galvanized steel due to corrosion resistance and durability.
- o **Size and Load Capacity:** Wider trays or those designed for heavy-duty applications cost more.
- o **Finish:** Powder-coated or hot-dip galvanized finishes increase the price.
- o **Accessories:** Bends, couplers, supports, and brackets add to the total cost.

Typical Price Range

While exact prices are not publicly listed online, industry estimates in Lebanon suggest:

- o **Standard galvanized steel trapezoidal trays:** \$20-\$40 per meter
- o **Stainless steel trays:** \$50-\$100 per meter
- o **Aluminum trays:** \$40-\$80 per meter. These prices may vary depending on supplier, order quantity, and delivery terms.

How to Obtain Exact Pricing

- o **Contact Suppliers Directly:** Metas Lebanon and SFSP Lebanon provide catalogs and can issue quotes based on your specifications.
- o **Specify Requirements:** Include tray type, material, dimensions, and quantity.
- o **Request Bulk Discounts:** Large orders often reduce per-meter costs.
- o **Check Compliance:** Ensure trays meet BS EN, NEMA, or IEC standards for safety and durability. By contacting suppliers directly, you can get accurate, up-to-date pricing and confirm availability for your project.
