

# Price of Multi-layer Multi-channel Cable Trays

## Article Overview

Multi-channel cable trays typically range from \$0.80 to \$76 per unit depending on material, size, and purchase volume.

## Pricing Overview

The cost of multi-channel cable trays varies significantly based on material, duty rating, and purchase type. For B2C retail purchases, such as home or office use, prices generally range from \$15 to \$34 per tray, with smaller under-desk or light-duty trays being more affordable. Wholesale or bulk purchases through B2B channels can be much lower per unit, starting around \$0.80, and can go up to \$76 for heavy-duty, industrial-grade trays made from stainless steel or hot-dipped galvanized steel .

## Factors Affecting Price

- o Material: Stainless steel, aluminum, and hot-dipped galvanized steel are more expensive but offer higher durability and corrosion resistance. Plastic or halogen-free trays are cheaper but suited for lighter loads .
- o Duty Rating: Light, medium, and heavy-duty trays differ in thickness and load capacity. Heavy-duty trays for industrial applications command higher prices .
- o Size and Configuration: Widths range from 50mm to 600mm, and lengths are typically 1m or 3m. Multi-channel or perforated designs may cost more due to increased manufacturing complexity .
- o Accessories: Couplers, bends, tees, crossovers, and lids add to the overall cost if purchased as part of a complete system .
- o Purchase Volume: Bulk orders for construction projects or data centers reduce per-unit cost, while single-unit retail purchases are higher .

## Market Context

The global cable tray market is growing due to infrastructure development, data center expansion, and renewable energy projects, which increases demand for durable and modular cable management systems. Leading suppliers include Schneider Electric, Eaton, Legrand, and Atkore, offering both standard and customized solutions .

## Recommendations

- o For industrial or commercial projects, consider B2B suppliers for bulk pricing and durable materials like stainless steel or hot-dipped galvanized steel.
- o For home or office use, B2C options on platforms like Amazon provide affordable, easy-to-install trays with
