

Article Overview

Tray-type cable trays in Sri Lanka typically range from LKR 1,500 to LKR 10,000 per meter depending on material, type, and supplier.

Overview of Cable Tray Types and Materials

Tray-type cable trays are available in several materials, each affecting cost and suitability:

- o Steel (Hot Dip Galvanized or Electro Galvanized): Common for industrial and commercial installations; offers strength and moderate corrosion resistance. Prices generally start around LKR 1,500-3,500 per meter for standard trays (Eastlink.lk)
- o Aluminum Alloy: Lightweight and corrosion-resistant, suitable for areas with high humidity; prices are higher, typically LKR 3,500-6,000 per meter
- o Stainless Steel: Provides superior corrosion resistance for critical infrastructure, such as data centers or coastal installations; prices can range from LKR 6,000-10,000 per meter (Eastlink.lk, C & D International)
- o Perforated Trays: Allow better ventilation for cables and are lighter; often priced slightly higher than solid trays due to manufacturing complexity (C & D International)

Supplier Options

- o Eastlink.lk: Offers a wide range of cable trays including steel, aluminum, and stainless steel options, suitable for industrial and commercial use
- o C & D International (Pvt) Limited: Specializes in perforated and ventilated trays, produced with CNC laser cutting and bending technology, providing joint pieces free of charge for easy assembly
- o Daraz.lk: Online marketplace offering competitive prices and convenient delivery, suitable for smaller projects or quick procurement

Additional Considerations

- o Length and Width: Standard trays are sold per meter; wider or custom sizes may increase cost.
- o Accessories: Bends, joints, and supports may add to the total project cost.
- o Bulk Orders: Suppliers often provide discounts for large quantities. For accurate pricing, it is recommended to contact suppliers directly with specifications such as material, width, and length, as prices can vary based on current market conditions and availability.
