

Price of clamp-type fiber optic splice closure bracket

Article Overview

Clamp-type fiber optic splice closure brackets typically range from \$20 to \$100 per unit, depending on manufacturer, capacity, and environmental rating.

Clamp-type fiber optic splice closure brackets are used to secure and organize fiber optic cables within splice closures, ensuring reliable connections and protection from environmental factors. Prices vary based on factors such as material quality, compatibility with specific closures, and whether the bracket is designed for aerial, buried, or indoor applications. Standard vendors include CommScope, Corning, and STAAR Corp, which offer closures and accessories tailored for FTTx networks .

Factors Affecting Price

- o Material and durability: Brackets made from high-grade plastics or corrosion-resistant metals cost more.
- o Capacity: Brackets designed to hold multiple fibers or accommodate larger closures are priced higher.
- o Environmental rating: Outdoor-rated brackets with UV and moisture resistance are more expensive than indoor-only models.
- o Vendor and order quantity: Wholesale purchases or bulk orders can reduce per-unit cost, while single-unit purchases from distributors may be higher .

How to Obtain Exact Pricing

- o Direct vendor inquiry: Many suppliers, including Graybar and Globalsources, require you to contact them with your ZIP code or order quantity to get a quote .
- o Online wholesale catalogs: Platforms like Globalsources list factory-direct prices for a wide range of fiber optic splice closures and accessories, which can help estimate costs for clamp-type brackets .
- o Manufacturer websites: Checking CommScope or Corning product pages can provide specifications and allow you to request a quote for your specific network requirements . In summary, while the typical price range is \$20-\$100 per bracket, the exact cost depends on the specific model, environmental rating, and vendor. For precise pricing, contacting the supplier directly with your project details is recommended.

CommScope FOSC 600 D Fiber Optic Splice Closure, Gel Sealing, Butt-Type, No Trays, Two 4-Port Gel Blocks, 4 Ground
