By combining the requirements from UL 65, the Standard for Wired Cabinets, and UL 962, the Standard for Household and Commercial Furnishing, UL 970 helps the industry better address the future of retail display products. One single Standard also simplifies the certification. As refrigeration equipment that comes into direct or indirect contact with food, the certification process for food display cabinets must focus on two core aspects: safety performance (electrical and refrigeration) and food contact safety. During this time, displays have undergone many innovations such as embedded computers, motion and LED lighting. In addition, displays are developed and manufactured for a shorter life cycle to keep retail shelves. IMARC Group's report, titled " Display Cabinet Manufacturing Plant Project Report 2026: Industry Trends, Plant Setup, Machinery, Raw Materials, Investment Opportunities, Cost and Revenue" provides a complete roadmap for setting up a display cabinet manufacturing plant. It covers a comprehensive. We wrote about the new version of BS EN ISO 23953:2023 (the test standard used to test supermarket display cabinets) a few months ago in our newsletter (RD&T news). 6 billion by 2025, growing at a solid rate of 6.
