Preview

This specific enclosure is designed to handle 380V three-phase power distribution, featuring a wall-mounted structure for space efficiency and a double-door configuration which provides expansive internal access and often a segregated inner door for added safety or panel viewing. This specific enclosure is designed to handle 380V three-phase power distribution, featuring a wall-mounted structure for space efficiency and a double-door configuration which provides expansive internal access and often a segregated inner door for added safety or panel viewing. Industry Standard: Low-voltage distribution boards (up to 1000V AC) represent 50% of the global market, with three phase 380V-415V systems being the dominant configuration for industrial applications. The 380V rating specifically refers to the line-to-line voltage in a three phase system. This. The low-voltage distribution box supports surface-mounted/flush-mounted installation, offering high safety performance. It integrates functions such as overload protection, short-circuit protection, leakage protection, metering, and intelligent control. Which is why products and systems featuring maximum safety and optimum efficiency are in. ABB Mini Center Compact distribution board is the basis for development and growth in meeting all the demands for a successful future in residential, commercial, and infrastructure segments. The wide range of distribution boards enables each customer to select an individual and economical. SP-XL low-voltage power distribution cabinet is suitable for three-phase three-wire, three-phase four-wire, three-phase five-wire system of 400V and below, and is used for power lighting distribution.

Introducing our Distribution Box without Internal Barrier, a high-performance low-voltage solution designed for versatile applications. With a rated voltage of 380V/220V and a current range of 250A to

With a rated voltage of 380V/220V and a current range of 250A to 6A, this distribution box adheres to the GB/T 7251.3-2017 standard, ensuring reliability and safety.

Mini Center Compact is a reliable range of distribution boards allowing maximum flexibility, offering wide choice of incomers: Switch Disconnecter, MCCB, MCB, RCCB, RCD or Direct Cable Connection.
