

Suppliers of multi-hole horizontal cable trays

Article Overview

Eurostrut, Oglaend System, Atkore, Metsec, and Siltec are key suppliers of multi-hole horizontal cable trays suitable for industrial and marine applications.

Recommended Suppliers

1. Eurostrut Eurostrut offers cable trays made of hot-dip galvanized steel or stainless steel, suitable for indoor and outdoor use. Their trays include perforated designs that reduce overheating and allow organized cable routing. They provide various widths, heights, and configurations, including distribution trays, cable routes, and NATO-type models. Quotes can be requested directly via their webshop . 2. Oglaend System Oglaend System provides a wide range of cable trays in materials such as stainless steel, galvanized steel, aluminum, and fiberglass (FRP/GRP). Their trays feature slot patterns for efficient positioning of cables and easy attachment of clamps or ties. They also offer cable ladder systems for heavier loads and a comprehensive range of brackets and fittings for flexible installation . 3. Atkore Atkore supplies solid bottom and ventilated cable tray systems designed to securely hold and protect cables. Their product range includes multiple models and sizes suitable for industrial applications, providing both standard and specialized solutions . 4. Metsec Metsec manufactures UK-based cable trays in mild steel (pre-galvanized or hot-dip galvanized) and stainless steel (316L). Their systems conform to BS EN 61537 standards and include medium and heavy-duty options with slotted return flanges for cable-friendly installation. They also offer bespoke designs, CAD drawings, and a full range of accessories for bends, tees, and junctions . 5. Siltec Siltec specializes in horizontal cable trays made of high-quality stainless steel, designed for corrosion resistance and cable protection. Their horizontal trays are available in widths from 200 to 600 mm, heights of 55 mm, and lengths up to 3000 mm. They use solid, rounded materials to prevent cable damage and share assembly fittings with other standard trays .

Key Considerations

- o Material choice: Stainless steel for corrosion resistance, galvanized steel for cost-effective durability, or FRP for lightweight and chemical resistance.
- o Tray configuration: Perforated or slotted trays allow better ventilation and cable management.
- o Accessories: Ensure availability of bends, tees, brackets, and connectors for complete installation.
- o Custom sizing: Some suppliers like Metsec and Eurostrut offer bespoke solutions for specific project requirements. These suppliers provide reliable options for multi-hole horizontal cable trays suitable for industrial, marine, and commercial installations.
