

The Role of Cable Trays in Myanmar

Article Overview

Yes, Myanmar uses cable trays extensively across residential, commercial, and industrial applications.

Cable trays are widely available in Myanmar and are manufactured by several local and international suppliers, including Cable House and Brilltech Engineers, which provide a range of standard and customized cable tray solutions . These trays are used to support and organize electrical wiring systems, offering a cost-efficient, reliable, and adaptable alternative to traditional conduit systems . They are suitable for applications in construction, industrial facilities, commercial buildings, and residential projects .

Types and Features

Cable trays in Myanmar come in various types, including ladder, trunking, and sheet metal trays, with standard widths ranging from 50mm to 700mm . They are designed for easy installation, minimal labor requirements, and long-term durability. Accessories such as connectors, joints, and earth links are also available to ensure proper assembly and grounding . Many manufacturers offer customization options to meet specific project requirements .

Applications

Cable trays are used to:

- o Organize and support electrical cables in industrial plants, commercial buildings, and residential complexes .
- o Provide ventilation and prevent overheating of electrical wiring due to their open design .
- o Facilitate maintenance and future expansion of electrical systems, making them more adaptable to changes .

Local Manufacturing and Supply

Myanmar has established cable tray manufacturing facilities that adhere to industry standards, using high-quality raw materials and modern production technologies . Companies like Cable House have been operating since 1983, supplying both domestic and international markets, while Brilltech Engineers provides ISO-certified products tailored to client specifications . These manufacturers ensure durability, reliability, and long operating life for their cable tray products. In summary, cable trays are actively used and manufactured in Myanmar, with a variety of types, sizes, and applications available to meet the needs of different industries and construction projects .
