An SFP module (Small Form-factor Pluggable) is a removable, standardized transceiver that plugs into an SFP cage or slot on networking devices such as switches, routers, server NICs, or media converters. This modular. When it comes to copper cabling, choosing the level of shielding you want the cable to have can prove a minefield of confusing acronyms and perplexing industry technology. We've put together this handy guide to help you understand the meaning of some of the most common terms. The shielding inside. Pshaw is an interjection people use to dismiss something as silly, ridiculous, or beneath consideration, usually with a hint of old-timey sarcasm. Okay so you have heard it in a movie or read it in a novel and wondered if it is still a thing. Spoiler: yes, but mostly as a playful, ironic. KOHO Financial, the Toronto-based fintech that serves more than 2.33 billion and putting it within reach of becoming Canada's first new federally regulated Schedule 1 bank in decades.
