

# What types of network cabinets are available in Botswana

## Article Overview

Network cabinets in Botswana include wall-mounted, free-standing, soundproof, seismic, and outdoor cabinets, all designed to securely house and organize IT and networking equipment.

### Wall-Mounted Cabinets

Wall-mounted cabinets are ideal for small offices, classrooms, or retail spaces where floor space is limited. They typically house lighter equipment such as patch panels, small switches, or routers. These cabinets are compact, easy to install, and provide basic security and organization for smaller networking setups .

### Free-Standing Cabinets

Free-standing cabinets are larger and more flexible, suitable for data centers, large offices, or industrial environments. They can accommodate servers, large switches, extensive cabling, and power distribution units. These cabinets come in various heights (measured in rack units, or 'U') and depths to fit standard 19-inch rack-mounted equipment, offering scalability for future expansion .

### Specialized Cabinets

- o Soundproof Cabinets: Reduce noise in open office environments while housing network equipment .
- o Seismic Cabinets: Built to withstand vibrations and seismic activity, important in areas prone to earthquakes .
- o Outdoor Cabinets: Weather-resistant enclosures with additional cooling or heating systems to protect equipment in outdoor installations .

### Open vs Enclosed Cabinets

- o Open Racks: Provide unobstructed airflow and easy access to equipment, suitable for environments where cooling and maintenance are priorities .
- o Enclosed Cabinets: Offer higher physical security, dust protection, and controlled airflow, often with locking doors and removable side panels .

### Key Features to Consider

When selecting a network cabinet in Botswana, consider:

- o Rack depth and height for equipment compatibility

# What types of network cabinets are available in Botswana

- o Load rating to support heavy servers or switches
  - o Ventilation or fan mounting options for cooling
  - o Locking doors and panels for security
  - o Cable management features such as vertical rails and entry points
- These types of network cabinets are widely available through local IT suppliers and distributors in Botswana, and they follow international standards, ensuring compatibility with most networking hardware.
