

Article Overview

Wholesale indoor optical cables typically range from \$0.20 to \$1.50 per foot, depending on type, core, and supplier.

Pricing Overview

The wholesale price of indoor optical cables varies based on fiber type, core size, length, and connectors. Multi-mode cables (50/125 or 62.5/125 microns) are generally less expensive, while single-mode cables (9-micron core) are priced higher due to superior long-distance performance . Typical bulk pricing examples include:

- o Multi-mode OM2/OM3 cables: \$0.20-\$0.50 per foot for 1000-foot spools .
- o Single-mode duplex cables: \$0.50-\$1.50 per foot depending on length and manufacturer .
- o Indoor/outdoor rated cables: Slightly higher due to additional protective jackets and UL/CMR compliance .

Supplier Options

- o CableWholesale: Offers single-mode and multi-mode indoor fiber optic cables with bulk discounts for large orders .
- o Made-in-China: Provides a wide range of indoor optical cables from Chinese manufacturers, often at lower cost, with options for OEM/ODM customization .
- o Alibaba: International suppliers offer wholesale indoor optical fiber cables suitable for data communication and networking projects .
- o Mouser Electronics: Stocks indoor fiber optic cables with datasheets and inventory for immediate purchase .
- o WholesaleCables.com: Offers multi-mode and indoor/outdoor fiber optic cables in 1000-foot spools, suitable for LAN and data center installations .

Factors Affecting Price

- o Fiber Type: Single-mode cables are more expensive than multi-mode due to higher precision and longer transmission capability.
- o Length and Quantity: Bulk spools (500-1000 feet) reduce per-foot cost.
- o Connector Type: Pre-terminated cables with LC, SC, or ST connectors cost more than bare fiber.
- o Compliance and Rating: Riser-rated (CMR) or plenum-rated (CMP) cables for indoor use may increase cost.
- o Sourcing Location: Chinese suppliers often offer lower prices, but shipping and import duties should be considered .

Recommendations

Wholesale Price of Indoor Optical Cable

- o For short-range indoor networks, multi-mode cables are cost-effective.
- o For long-distance or high-speed applications, single-mode cables are recommended despite higher cost.
- o Always verify supplier certifications, UL/ISO compliance, and product samples to ensure quality and reliability . By considering these factors, businesses can source indoor optical cables at competitive wholesale prices while meeting technical requirements.
