

Zambian telecommunications data center construction companies

Article Overview

Key Zambian companies for telecommunications and data center construction include DC Deployed, International Engineering 24, LTS Group, Venture Communications & Construction, and Agro Africa Zambia.

Leading Companies

DC Deployed specializes in data center construction management in Zambia, offering expertise in project planning, contractor selection, and modular prefabricated data centers for rapid deployment. They provide end-to-end consulting, including feasibility studies, construction budgeting, scheduling, and MEP (mechanical, electrical, plumbing) systems tailored to local conditions and global standards. International Engineering 24 (IE24) delivers state-of-the-art data center construction services, including site assessment, structural and electrical design, precision cooling, fire suppression, energy-efficient technologies, and modular designs for scalability. Their focus is on secure, reliable, and future-ready IT infrastructure for businesses across Zambia. LTS Group (formerly Lusaka Telecom) offers turnkey ICT solutions, including data center surveys, network equipment installation, power systems, backup power, and monitoring systems. They integrate AI-powered surveillance, ERP solutions, and fiber optic infrastructure, ensuring compliance with international standards and tailored solutions for clients. Venture Communications & Construction (VCC) provides telecommunications and civil construction services, including physical network infrastructure, mobile operator support, and turnkey solutions for ISPs, government, and corporate clients. They focus on project management, site engineering, and delivering customized infrastructure solutions. Agro Africa Zambia Limited is a telecommunications and infrastructure provider with experience in fiber optic installation, cell tower maintenance, and site preparation. They maintain over 35 tower sites and 3,000 km of fiber network, offering end-to-end infrastructure services across all 10 provinces of Zambia.

Summary

These companies collectively cover data center construction, modular deployment, fiber optic integration, power and cooling systems, and turnkey telecommunications infrastructure. They serve a wide range of clients, including mobile operators, ISPs, government agencies, and private corporations, making them key players in Zambia's growing digital and telecommunications landscape.
