

Zimbabwe Mobile Fiber Optic Cannot Be Used with Routers

Preview

Econet has announced that its SmartBiz data lines will stop functioning in mobile phones from September 10, 2025, and will only be accessible through Wi-Fi routers. The change was communicated to subscribers via SMS on Friday, urging them to purchase routers from Econet shops to remain connected. Zimbabwe's internet connectivity has taken a significant leap forward with the expansion of its fiber optic network. According to a report by the Postal and Telecommunications Regulatory Authority of Zimbabwe (POTRAZ), the country's fiber optic network has grown by 15% in the past year alone. Unlike traditional DSL or mobile internet, fibre provides faster speeds, lower latency, and greater reliability. It is ideal for activities like video conferencing, 4K streaming, and cloud-based. Liquid Home (formerly ZOL) is Zimbabwe's largest fixed internet service provider. They provide the following services: LTE which is can be fixed or mobile in the form of MIFI.
